5 Foriba Bulut Sertifikasının İstemci SAP NW Sistemlere Yüklenmesi

Foriba Bulut Sistemlerinde sertifika güncelleme işleminin hangi tarihte yapılacağı önceden duyurulmaktadır. Bu tarih henüz gelmeden önce istemci sistemlerde önceden yeni sertifika tanımlanmalıdır. Bu sayede Bulut sistemlerde sertifika güncelleme işlemi yapıldığında, istemciler erişim kesintisi yaşamadan haberleşmeye devam edebilirler.

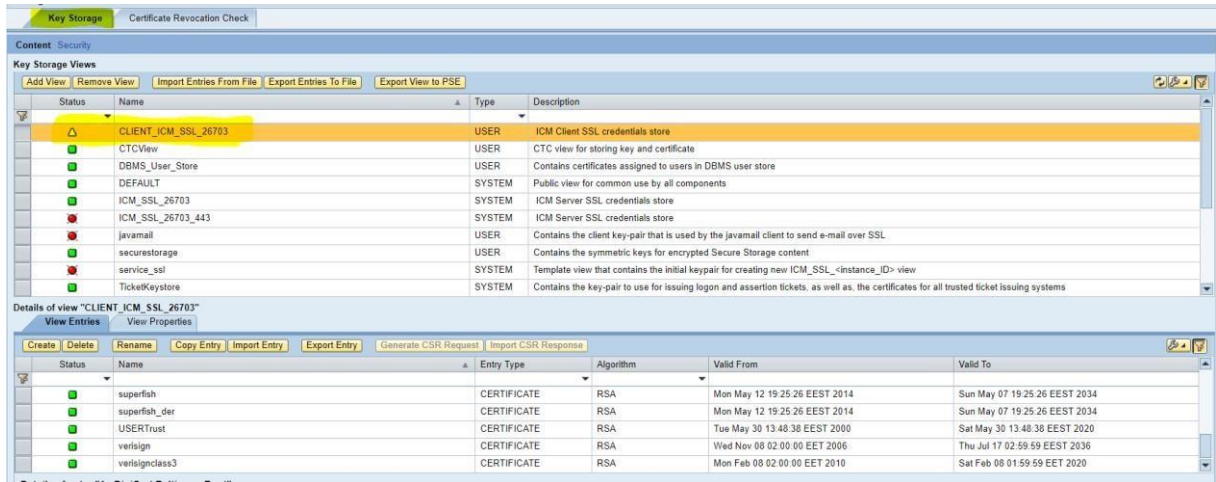

5.1 Güncel Sertifikanın İlgili Java Keystore'a Yüklenmesi

SAP NW AS Java'nın, eriştiği sunuculara ait SSL sertifikalarının tanımlandığı keystore' a erişmek için NWA'ya yönetici yetkileri ile giriş yapılması ve aşağıdaki işlemlerin sırasıyla gerçekleştirilmesi gerekmektedir.

1. NWA'ya yönetici yetkileri ile giriş yapılır.
2. Configuration -> Certificates and Keys menüsüne gidilir.

3. CLIENT_ICM_SSL_ <instance_ID> keystore'u seçilir.

4. Details of view "CLIENT_ICM_SSL_ <instance_ID>" bölümünde Foriba tarafından sağlanan kök, ara kök ve erişilecek sisteme ait sertifikalar "Import Entry" butonuna tıklandıktan sonra "Select Entry Type" seçeneğinden "X.509 Certificate" seçilerek içeri aktarılır. Sectigo'ya ait AAA, kök, ara kök ve *.fitbulut.com sertifikası olmak üzere toplam 4 adet import işlemi gerçekleştirilir.
