1 Change History

1.0	13.05.2019	Document created.
1.1	20.06.2022	Document has been updated because of certificate renewal

2 Document Introduction

This document is a guide on how to add *.fitbulut.com certificate to the list of trusted certificates on the client side, especially for SAP NW AS Java clients that will be connected to Foriba Cloud systems via HTTPs.

3 Abbreviations

Abbreviation	Description
Foriba Cloud	Foriba Cloud Platform
TRA	Turkish Revenue Administration
WS	Web Service
API	Application Programming Interface
SSL	Secure Sockets Layer
HTTP	Hyper Text Transfer Protocol
HTTPs	Hyper Text Transfer Protocol Secure – HTTP over SSL
*.fitbulut.com	Name of the certificate that is used on Foriba Cloud Platform
ICM	Internet Communication Manager
NW AS - Java	Netweaver Application Server – Java
NWA	NetWeaver Administration Portal

4 Obtaining Foriba Cloud SSL Certificates

To connect to the Foriba Cloud system, follow the link <http://api.fitbulut.com> and click the Download SSL Certificates button.

In the .zip file you downloaded, two different folders will be displayed as below.

loads > Sovos Cloud SSL Certificates > Sovos Cloud SSL Certificates > Sovos Cloud SSL Certificates			
Name	Date modified	Type	Size
09.05.2019-11.08.2021	6/20/2022 2:20 PM	File folder	
14.07.2021-15.07.2022	6/20/2022 2:20 PM	File folder	
16.06.2022-17.07.2023	6/20/2022 2:20 PM	File folder	

Open the certificate folder you want to install, and then check that the files are on your computer. *(In this case it is: 16.06.2022 – 17.07.2023)*

> This PC > Desktop > Sovos Cloud SSL Certificates > Sovos Cloud SSL Certificates > Sovos Cloud SSL Certificates > 16.06.2022-17.07.2023			
Name	Date modified	Type	Size
AAA Certificate Services.cer	7/27/2021 1:27 PM	Security Certificate	2 KB
fitbulut.com.cer	6/16/2022 5:20 PM	Security Certificate	7 KB
Sectigo RSA Organization Validation Sec...	7/27/2021 1:28 PM	Security Certificate	2 KB
USERTrust RSA Certification Authority.cer	7/27/2021 1:28 PM	Security Certificate	2 KB

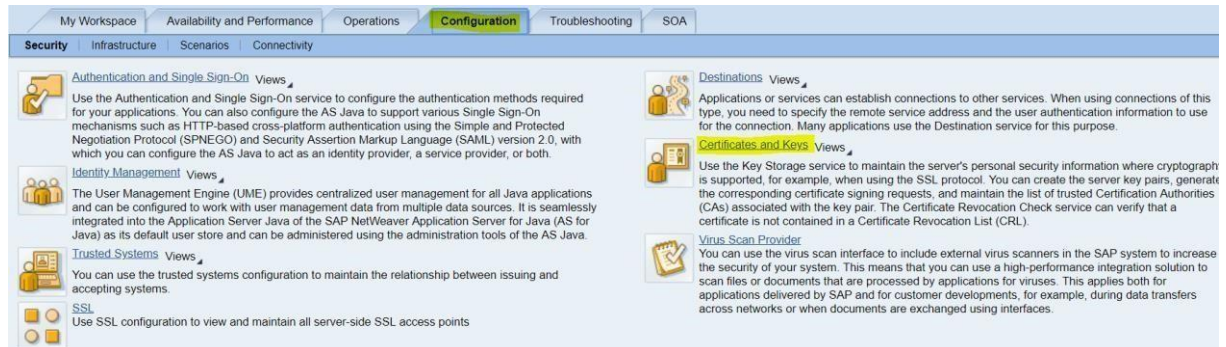

5 Installing Foriba Cloud Certificate on Client SAP NW Systems

The date of the certificate update process is announced in Foriba Cloud Systems in advance. Prior to this date, a new certificate must be defined in client systems. In this way, when the certificate update process is performed on Cloud systems, clients can continue to communicate without any interruption.

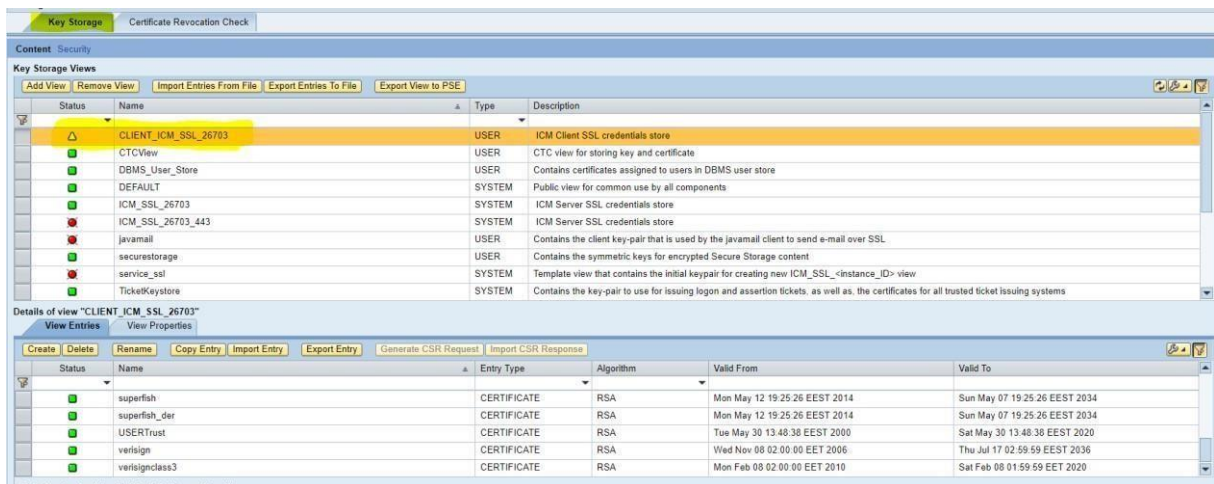

5.1 Uploading the Current Certificate to the Related Java Keystore

In order to access the keystore where the SSL certificates of the servers are defined by SAP NW AS Java, it is necessary to login to the NWA with administrator privileges and perform the following operations respectively.

1. Login to NWA with Administrative privileges.
2. Go to Configuration -> Certificates and Keys:

3. Select CLIENT_ICM_SSL_ <instance_ID> keystore.

4. In the "Details of view "CLIENT_ICM_SSL_ <instance_ID>"" click "Import Entry" and choose "X.509 Certificate" in the "Select Entry Type" section. Then choose the files you downloaded from api.fitbulut.com one by one and import 4 of them to the kesystore.
